Summary

Computer Science student focused on web and application development, with experience building digital products through academic and competition projects. Skilled in Next.js, Kotlin, Python, and API integration, with a strong foundation in UI/UX and user-centered product development.

Education

Binus University — Bandung, Indonesia
Computer Science; GPA: 2.87 /4.0 — 2024 - Present

SMA Negeri 1 Sumber — Cirebon, Indonesia
Natural Science — 2021 - 2024

Experience

Game Designer & Developer | Binus Library Knowledge Center, Bandung, Indonesia — **Feb 2026 – Present**

- Spearheaded the development of a 1:1 digital twin of the BINUS Bandung campus in Roblox Studio, ensuring high architectural accuracy that successfully brought the physical university experience into an accessible virtual space.
- Executed meticulous 3D environment detailing and spatial design—from complex multi-level structures to authentic library interiors—which significantly elevated the visual fidelity and player immersion within the game.
- Optimized the virtual environment's layout to seamlessly integrate with interactive gameplay mechanics, delivering an engaging, realistic, and highly navigable digital exploration experience for users.

Bentani Hotel and Residence | Sales Team Lead — May 2024 - July 2026

- Led and mentored a sales team to consistently achieve and exceed revenue targets through effective strategic planning and daily performance tracking.

Technical Projects

Mansda | Fashion E-Commerce Website
UI/UX Design · Figma · Interactive Prototyping

- Designed an elegant fashion e-commerce website featuring a cohesive visual identity, product collections, and an editorial-inspired layout with a refined burgundy, black, and white color palette.
- Developed high-fidelity UI designs for the homepage, product collections, and product cards, emphasizing visual consistency, typography, and intuitive navigation.
- Designed interactive user flows and website prototypes in Figma, exploring shopping experiences and AI-powered outfit styling to help users visualize clothing combinations.

Guyub | On-Demand Home Services Application
UI/UX Design · Figma · Interactive Prototyping

- Designed an on-demand home services application connecting users with service providers for household needs, including domestic helpers, babysitters, gardeners, and car wash services.
- Developed end-to-end user flows for service selection, provider preferences, equipment availability, payment processing, and service history, inspired by real-time service-booking platforms.
- Created high-fidelity UI prototypes in Figma featuring interactive service categories, provider-matching flows, QR-based payment confirmation, and a cohesive visual design system with friendly illustrations and reusable UI components.

Hemy | Full-Stack Portfolio Platform
UI/UX Design · Figma · Interactive Prototyping

- Designed end-to-end UI/UX workflows for a hamster lovers community app, featuring onboarding stories, food tracking, care guides, and community feed features.Created responsive interfaces and reusable components.
- Created high-fidelity prototypes and custom mascot interactions in Figma, incorporating smooth onboarding splash screen animations using Smart Animate and Masking techniques.
- Established a cohesive visual design system, including a friendly color palette, custom typography, UI components, and interactive

form controls.

Organization

Bina Nusantara English Club | Staff Learning and Management Sept 2024 - Sept 2025

- Managed and coordinated English learning programs, ensuring smooth communication and scheduling between tutors and club members.
- Monitored members attendance and learning progress to evaluate and support the
- effectiveness of the educational programs.
- Led the consumption committee for a 2025 BNEC event, efficiently managing budgeting, vendor relations, and logistics for event attendees.

Skills and Language

Technical Skills: Next.js, Kotlin, Tailwind CSS, PostgreSQL
Tools: GitHub, Figma
Languages: Indonesia (Native) | English (Good)
